

Dial-Up Connection Setup

Windows Vista and Windows 7

1. Click the **Windows** Button (Start Button)

2. Click **Control Panel**

3. Click **Network & Internet Options.**

4. Click the **Internet Options** Link.

5. Click the **Connection** Tab at the top.

6. Click **Set Up** button.

7. Type the **dial-up number** for you

Your phone # prefix:	Your dial-up #:
985, 695, 287, 538, 694, 323.....	715-985-2700
926, 878.....	715-287-2700
984, 597, 983.....	715-984-2700
582, 534, 539.....	582-4848
964, 334, 963, 333, 284.....	964-1044
989, 525.....	989-9623

8. Type your TCC **username & password**

If you don't know your username and password, look in your original paperwork from TCC or contact TCC.

9. Make sure Remember this password is checked. [Unless you want to have to type it each time!]

10. Type **TCC** into the Connection name box.

11. Click **Connect.**

12. If your computer is not connected to a phone line, the Internet connection will report it was unsuccessful. Click Set up connection anyway.

13. If your computer connects, you can now browse the Internet.

14. Click Close to get out of the wizard.

15. Close any other open windows that are not needed.

You're Finished! You can click Start, then Internet Explorer to open your browser and click Connect in the dialup connection box that appears to begin the connection process. Once connected, you are ready to browse the web or check your email.
